

New generation

By Lucia Qing Fernandez Diez, Paula Gomez Saenz and Marco Fernandez Gonzalez.

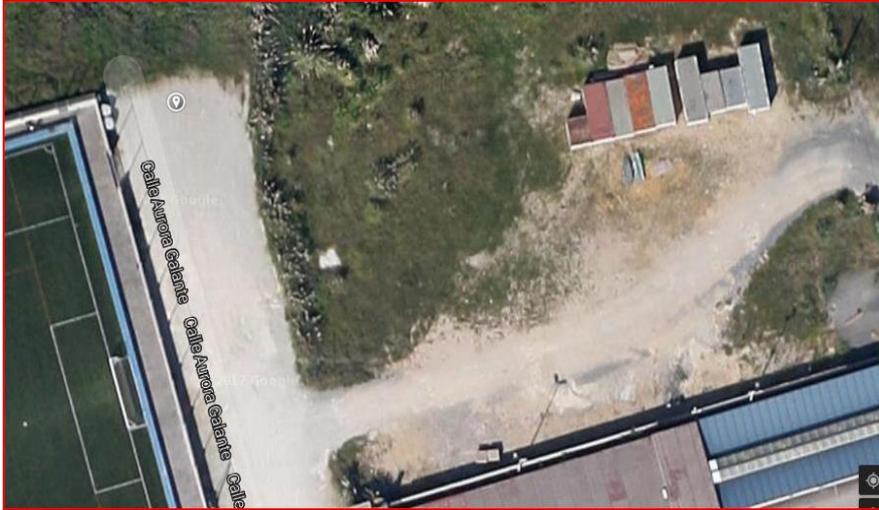

OUR PROJECT

-Why did we choose an iPhone?

Because we want to represent new technologies and how important they are in teenagers' lives. We think this sculpture is the best method to do it.

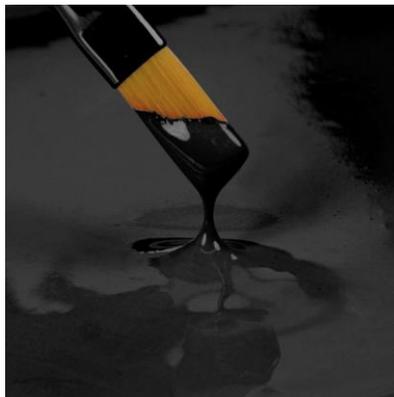

Where is it?

This place is in La Albericia, here there is not anything interesting, so it is very ugly and we think it is good to improve the place putting a sculpture.

What is made of:

- Cans
- Cardboard
- Silicone
- Black Paint
- Foil

How did we do it?

- 1.- First, of all, we pasted and painted with black paint all the cans.
- 2.- Then with cardboard we did the screen and the back of the iPhone.
- 3.- Next, we painted the cardboard with black paint and we glued it
- 4.- After that we cut a piece of cardboard with the shape of an apple an we cover it with the foil.
- 5.- Finally, we designed the apps and the camera and we glued it to the screen.
